Education

University of California San Diego San Diego, CA

B.S. Cognitive Science (Spec. Machine Learning & Neural Computation) *Sept. 2021 – Sept. 2025*

- Relevant Coursework: UX/UI Design, Data Science, Brain-Computer Interfaces, Machine Learning Algorithms, Information Technology

Experience

Worker / Employee Sept. 2025 – Present

N.D. Smog & Auto Repair *Pomona, CA*

- Assisted customers with paperwork and facilitated accurate checkout and payment processing
- Performed printer maintenance and repair
- Procured and transported raw materials, tires, and equipment to ensure timely availability
- Assisted in Smog checks, Brake and Lamp Inspections

UX Researcher Jan. 2026 – Aug. 2026

Sensio Air Intelligence *Remote / CGU, CA*

- Conducted comprehensive UX evaluation for Sensio Air Intelligence's consumer-facing website pilot, transitioning the company from B2B to B2C market
- Evaluated website using Nielsen's 10 Usability Heuristics and performed moderated user testing with diverse participants
- Administered System Usability Scale (SUS) surveys and analyzed results to quantify user experience quality
- Delivered prioritized recommendations that are projected to increase the platform's SUS score by 33%

MyMizu *Remote / CGU, CA*

- Conducted stakeholder interviews and moderated usability testing with international participants to identify barriers to retention and map user needs around impact tracking and habit formation
- Synthesized interview findings through affinity mapping and developed a composite user persona that guided prioritization of personal impact metrics over social comparison features
- Translated research insights into a high-fidelity dashboard redesign that emphasized self-comparison, progress milestones, and clearer personal impact tracking to improve long-term engagement

Projects

EEG-Based Classification of Emotional States in Gameplay Jan. 2025 – Mar. 2025

Python, NumPy, SciPy, Pandas, Matplotlib

- Analyzed EEG data from 30 subjects across 4 game genres using band-pass filtering and statistical tests (ANOVA, Tukey HSD)
- Processed EEG signals and visualized frequency-band power distributions
- Found no statistically significant differences across genres, identified dataset limitations and suggested improvements

Predicting League of Legends Match Outcomes with Machine Learning Jan. 2024 – Mar. 2024

Python, Pandas, Scikit-learn, XGBoost, Random Forest, Riot API

- Analyzed 10,000+ Diamond-ranked matches, extracted 40+ features and engineered new performance metrics
- Developed and optimized ML models (Random Forest, XGBoost, KNN) achieving up to 99% accuracy
- Extended analysis to Challenger tier via Riot API scraping for comparative gameplay strategy insights

Piazza Mobile Design Concept (Interactive Prototype) | *Figma* Sept. 2024 – Dec. 2024

- Conducted usability testing and heuristic evaluation (Nielsen's 10 Heuristics)
- Designed improved mobile interface with better navigation and visual scanning

Technical Skills

Languages: Java, Python, R
Frameworks/Libraries: JUnit, Pandas, NumPy, SciPy, Matplotlib, Scikit-learn, Seaborn, XGBoost
Developer Tools: Git, GitHub, VS Code, Jupyter Notebooks
UX/UI: Figma, User Usability Testing
